900 hours
in 1 year, in the shift opposite to regular school hours

Theory and practice
on management during the course:
• in training spaces provided by partners (schools) in rural areas
• on the property, with the family
• together with the community
• technical visits and study trips
• seminars

Partnerships
Municipalities and schools
Rural unions, rural extension, security and other entities
Rural management and entrepreneurship

Curriculum hubs focused on the following practical activities:
1. Studies and analyses of rural properties
2. Diagnosis of the municipality and region, with studies on local productive arrangements
3. Mapping of local partnerships and strategic alliances
4. Development of group works, involving the families and community
5. Creation and studies on the viability of the development of a management product
Rural Professional Learning Program

474 young apprentices

26 groups
In different territories of 11 municipalities

75 study trips per year
Study tours, technical and regional visits

30 seminars a year
Putting into practice the acquired knowledge, through seminars conducted during the course, is an integral part of the pedagogical project of the Rural Professional Learning Program

94% of adolescents concluded the course in 2019
rate that exceeds the national average (68%) and the numbers of other countries, like Germany (75%)
Thanks!    Gracias!    Obrigada!
